Automatic Purge
*(only available with models equipped with Airbath®)*
Thirty minutes after the water falls below the water level sensor the blower will start again for a one-minute purge cycle allowing piping to thoroughly dry.

**Note:** Blower hose for Airbath Systems is shipped loose:
1. Remove red caps from blower and check valve.
2. Attached grey hose to blower and check valve.
3. Tighten clamp around each end.
The Builder Series whirlpool is equipped with an On/Off Button (fill tub until the highest jet is covered by at least 2” of water. Do not run pump without water in the tub.)

1. Press the Button to start the pump.

2. Press a second time to stop the pump. The Control Box is manufactured with a 10 minute timer that will turn off the unit automatically. To continue your bath, simply push the Button to repeat the cycle.

Note: If OPTIONAL built in water level sensor is installed on your tub, fill the tub with water until the water level sensor pad is covered. Now you can press the Button to start the pump.

---

**Always use dedicated outlets for each power supply.**

---

The LUXURY SERIES of whirlpools offers advanced features such as Chromotherapy and Water Level Sensor. Here are the instructions for operating:

1. Press the Button to start the pump.

2. Press a second time to stop the pump. The Control Box is manufactured with a 20 minute timer that will turn off the unit automatically. To continue your bath, simply push the Button to repeat the cycle.

**Water Level Sensor**

If water falls below water level sensor while pump is on, the system will turn OFF.

---

**Always use dedicated outlets for each power supply.**

---

The PLATINUM SERIES and LUXURY SERIES + LIGHT offer a unique combination of features, including Chromotherapy and Water Level Sensor.
